-To use the properties of Flexbox, you need to set the container's display as FLEX

Flexbox Concepts:-

1. Items are laid in Flex-Direction. (and not in left-to-right)
2. Items are laid in Main-axis.
3. "Justify-content" is applied on Main-axis.
   e.g.: justify-content: flex-start, this starts the content from main-start.
